B. SCOPE OF WORK

The character and scope of the work are set forth in the contract. The Contractor shall furnish and install all materials required by this contract.

In case of differences between small and large-scale drawings, the latter will govern. Where a portion of the work is drawn in detail and the remainder of the work is indicated in outline, the parts drawn in detail shall apply also to all other portions of the work.

C. PACKAGING AND MARKING

Mark materials delivered to the site as follows:

AMERICAN EMBASSY, MANILA

For: Purchase Order No. (to be completed upon award)

D. INSPECTION AND ACCEPTANCE

The COR, or his/her authorized representatives, will inspect from time to time the services being performed and the supplies furnished to determine whether work is being performed in a satisfactory manner, and that all supplies are of acceptable quality and standards.

The Contractor shall be responsible for any countermeasures or corrective action, within the scope of this contract, which may be required by the Contracting Officer as a result of such inspection.

D.1 SUBSTANTIAL COMPLETION

(a) "*Substantial Completion*" means the stage in the progress of the work as determined and certified by the Contracting Officer in writing to the Contractor, on which the work (or a portion designated by the Government) is sufficiently complete and satisfactory. Substantial completion means that the property may be occupied or used for the purpose for which it is intended, and only minor items such as touch-up, adjustments, and minor replacements or installations remain to be completed or corrected which:

- (1) do not interfere with the intended occupancy or utilization of the work, and
- (2) can be completed or corrected within the time period required for final completion.

(b) The "date of substantial completion" means the date determined by the Contracting Officer or authorized Government representative as of which substantial completion of the work has been achieved.

Use and Possession upon Substantial Completion - The Government shall have the right to take possession of and use the work upon substantial completion. The certificate will be accompanied by a Schedule of Defects listing items of work remaining to be performed, completed or corrected before final completion and acceptance. Failure of the Contracting Officer to list any item of work shall not relieve the Contractor of responsibility for complying with the terms of the contract. The Government's possession or use upon substantial completion shall not be deemed an acceptance of any work under the contract.

D.2 FINAL COMPLETION AND ACCEPTANCE

D.2.1 "Final completion and acceptance" means the stage in the progress of the work as determined by the Contracting Officer and confirmed in writing to the Contractor, at which all work required under the contract has been completed in a

satisfactory manner, subject to the discovery of defects after final completion, and except for items specifically excluded in the notice of final acceptance.

D.2.2 The "*date of final completion and acceptance*" means the date determined by the Contracting Officer when final completion of the work has been achieved, as indicated by written notice to the Contractor.

D.2.3 FINAL INSPECTION AND TESTS. The Contractor shall give the Contracting Officer at least five (5) days advance written notice of the date when the work will be fully completed and ready for final inspection and tests. Final inspection and tests will be started not later than the date specified in the notice unless the Contracting Officer determines that the work is not ready for final inspection and so informs the Contractor.

D.2.4 FINAL ACCEPTANCE. If the Contracting Officer is satisfied that the work under the contract is complete (with the exception of continuing obligations), the Contracting Officer shall issue to the Contractor a notice of final acceptance and make final payment upon:

- Satisfactory completion of all required tests,
- A final inspection that all items by the Contracting Officer listed in the Schedule of Defects have been completed or corrected and that the work is finally complete (subject to the discovery of defects after final completion), and
- Submittal by the Contractor of all documents and other items required upon completion of the work, including a final request for payment (Request for Final Acceptance).

- (b) These schedules shall include the time by which shop drawings, product data, samples and other submittals required by the contract will be submitted for approval.
- (c) The Contractor shall revise such schedules (1) to account for the actual progress of the work, (2) to reflect approved adjustments in the performance schedule, and (3) as required by the Contracting Officer to achieve coordination with work by the Government and any separate contractors used by the Government. The Contractor shall submit a schedule, which sequences work so as to minimize disruption at the job site.
- (d) All deliverables shall be in the English language and any system of dimensions (English or metric) shown shall be consistent with that used in the contract. No extension of time shall be allowed due to delay by the Government in approving such deliverables if the Contractor has failed to act promptly and responsively in submitting its deliverables. The Contractor shall identify each deliverable as required by the contract.
- (e) Acceptance of Schedule: When the Government has accepted any time schedule; it shall be binding upon the Contractor. The completion date is fixed and may be extended only by a written contract modification signed by the Contracting Officer.  - (1) Extend the completion date or obligate the Government to do so,
 - (2) Constitute acceptance or approval of any delay, or
 - (3) Excuse the Contractor from or relieve the Contractor of its obligation to maintain the progress of the work and achieve final completion by the established completion date.

NOTICE OF DELAY

If the Contractor receives a notice of any change in the work, or if any other conditions arise which are likely to cause or are actually causing delays which the Contractor believes may result in late completion of the project, the Contractor shall notify the Contracting Officer. The Contractor's notice shall state the effect, if any, of such change or other conditions upon the approved schedule, and shall state in what respects, if any, the relevant schedule or the completion date should be revised. The Contractor shall give such notice promptly, not more than ten (10) days after the first event giving rise to the delay or prospective delay. Only the Contracting Officer may make revisions to the approved time schedule.

NOTICE TO PROCEED

- (a) After receiving and accepting any bonds or evidence of insurance, the Contracting Officer will provide the Contractor a Notice to Proceed. The Contractor must then prosecute the work, commencing and completing performance not later than the time period established in the contract.
- (b) It is possible that the Contracting Officer may elect to issue the Notice to Proceed before receipt and acceptance of any bonds or evidence of insurance. Issuance of a Notice to Proceed by the Government before receipt of the required bonds or insurance certificates or policies shall not be a waiver of the requirement to furnish these documents.

WORKING HOURS

All work shall be performed from **7:30 a.m. to 4:30 p.m.**, from **Mondays to Fridays, excluding American and Philippine holidays**. Other hours, if requested by the Contractor, may be approved by the Contracting Officer's Representative (COR). The Contractor shall give four (4) days in advance to COR who will consider any deviation from the hours identified above. S I T E: U.S. Embassy Baguio Compound

B.1 DESCRIPTION OF WORK

B.1.1 The contractor shall provide all materials, labor, transportation, tools, equipment and skilled workers, including a competent English speaking on-site supervisor, to perform and satisfactorily accomplish the **Asphalt Repair and Overlay (Phase 1 & 2), with an approximate area of 175 m² for repair and 4,154.00 m² for overlay, at the U.S. Embassy Baguio Compound**, in accordance with this specifications and accompanying technical drawing/s. Measurement and conditions at the work site must be verified by the Contractor.

B.1.2 The scope of work shall include the following:

- a. Repair of Potholes
- b. Resurfacing of Existing Pavement
- c. Repair of concrete curbs, gutters and road signs
- d. Site Cleaning
- e. Painting

B.2 TECHNICAL PROVISION

B.2.1 REPAIR OF POTHoles AND PAVEMENT DEFECTS

- a. Patch-up and repair all defective pavement and potholes by excavating rectangular patches, extending 12 inches (300 mm) into adjacent sound pavement, unless otherwise indicated. Cut excavation faces vertically. Remove excavated material. Re-compact existing unbound aggregate base coarse to form new sub-grade compact.
- b. Defective pavements caused by tree roots shall be removed by two (2) inches or larger in diameter, at least two feet below the finished sub-grade line. Holes that are deeper than the sub-grade level shall be filled with material that is capable to form a suitable fill.
- c. After the area to be patched has been properly prepared - with edges trimmed and correct prime and tack coats applied, the hole shall be filled with asphalt bituminous concrete. The quantity of material to be placed in the patch should be sufficient to ensure

that the patched surface, after compaction, is level with the adjacent surface.

- d. When the base course or sub-grade is found defective or loose, the subgrade shall be replaced with a 3" thick crushed base coarse tamped with mechanical compactor to 95% compaction. After the base course has been repaired, apply priming coat of emulsified asphalt. The side of the hole should be tack- coated with emulsified asphalt to ensure bond between the existing and the patch mix (asphalt bituminous concrete). Asphalt primer and tack coat should be applied twenty four (24) hours before filling with the required volume of asphalt bituminous concrete.
- e. When the base of the cut asphalt has been disturbed, item B.2.1 should be followed.
- f. Periodic compaction test of sub-base will be performed, if needed, depending upon the discretion of COR.
- g. For areas where grass grows, the contractor should apply herbicide treatment on the surface prior to application of bituminous tack coat.

B.2.2

RESURFACING/OVERLAY OF PAVEMENT

- a. All defective areas and potholes shall be repaired prior to any pavement preparation or a level coarse application. After repair work has been completed, the surface shall be swept clean until it is free of all dirt, sand mud, dust, loose and foreign materials. This will condition and prepare the surface for the application of the tack coat prior to resurfacing.
- b. Tack coat shall be applied on all asphalt-paved surfaces and repaired areas before resurfacing is performed. Tack coat shall be emulsified asphalt cold mix (two gallons of pure water per 55 gallon drum of pure emulsified asphalt). Tack coat shall be applied with a self-powered pressure distribution only. No application shall be made when weather is foggy or rainy. Tack coat shall be evenly applied at the rate of 1-1/2 liters per square yard of surface area. The surfaces of structures, trees and plants adjacent to the area being treated shall be protected to prevent splatter. Attention shall be taken that the application at junction spreads is not in excess of the specified amount. Any excess coat application shall be removed

from the surface.

- c. Grade of low areas shall be adjusted for efficient drainage as directed by COTR. All affected manholes and covers shall be raised or lowered before resurfacing work is started.
- d. Leveling Course: A coarse (asphalt aggregate mixture) of variable thickness shall be applied first to eliminate irregularities in the contour of existing surface.
- e. Bituminous Resurfacing: The two (2) inches thick asphalt overlay or resurfacing coarse shall be plant hot mixed asphalt bituminous concrete spread over the prepared existing paved area to be resurfaced (thickness and cross section per accompanying drawing). The plant hot mixed bituminous surface course shall be composed of " coarse mineral aggregate", " fine aggregate", mineral filler and bituminous material conforming to the specifications for bituminous concrete surfaces by the Philippine Standard specifications for highways and bridges, latest edition. Asphalt laying temperature should not be less than 107°C. Surface course shall follow existing line and cross section of the asphalt paving except in low areas which has to be adjusted as directed by COR. It shall be spread by asphalt paver to the required amount, depth and cross section.
- f. Traffic shall be kept off the tack coat at all times. The tack coat shall be sprayed only so far in advance on the surface course as will permit it to dry to a tacky condition. The Contractor shall maintain the tack coat until the next course has been placed. Any area that has become fouled, by traffic or otherwise, shall be cleaned and re-sprayed as the Contractor's expense before the next course is applied.
- g. After resurfacing is done, initial rolling should be done by a tandem roller followed by pneumatic roller. Use pneumatic roller not less than 10 tons in weight immediately after spreading and smoothing while bituminous binder is still warm and shall continue until the pavement is thoroughly compacted and bonded. Rolling shall progress gradually from the sides to the center line of the roadway and lapping uniformly each preceding rear wheel track by one half of the width and shall continue until the aggregate does not creep or displace ahead of the roller. While the surface is being compacted and finished, the edge shall be neatly trimmed to line.

B.2.3 REPAINTING OF PARKING LINES, DIRECTIONAL TRAFFIC LINES, ROAD CURBS AND ROAD SIGNS

- a. The Contractor shall paint traffic lines, road curbs, parking stall lines and road signs with traffic paint whose spacing, width and color are at the discretion of the COR.
